Pulse

Inventory Forecasting & Planning

Turn changing demand
into one clear plan.

NeuraFlow Pulse

Inventory Management

See risk early. Plan what comes next.

1 Demand signals → 2 Stock position → 3 Action plan

Identify Key Risks

- Find the category at risk.
- See the product causing it.
- Act before stock runs out.

1 Category first

2 Product next

Easy Onboarding

Start with what you have.

- Use the sales records you already have.
- Begin with an estimate you approve.
- Improve as real sales build.

Smart Analysis

Five facts. One practical plan.

NEED

Demand

Safety stock

AVAILABLE

Current stock

Incoming stock

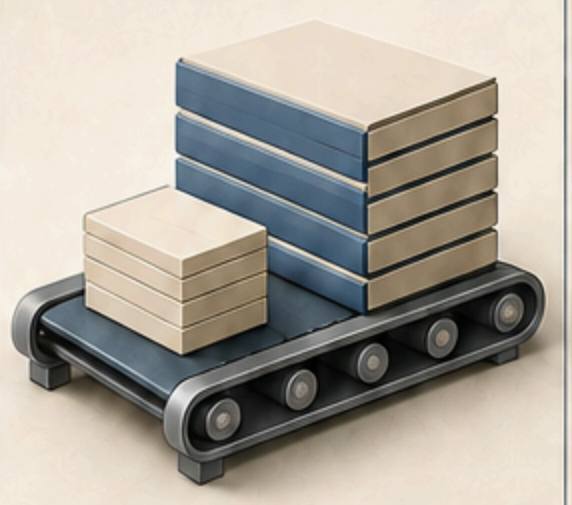

TIMING

Replenishment time

What to make

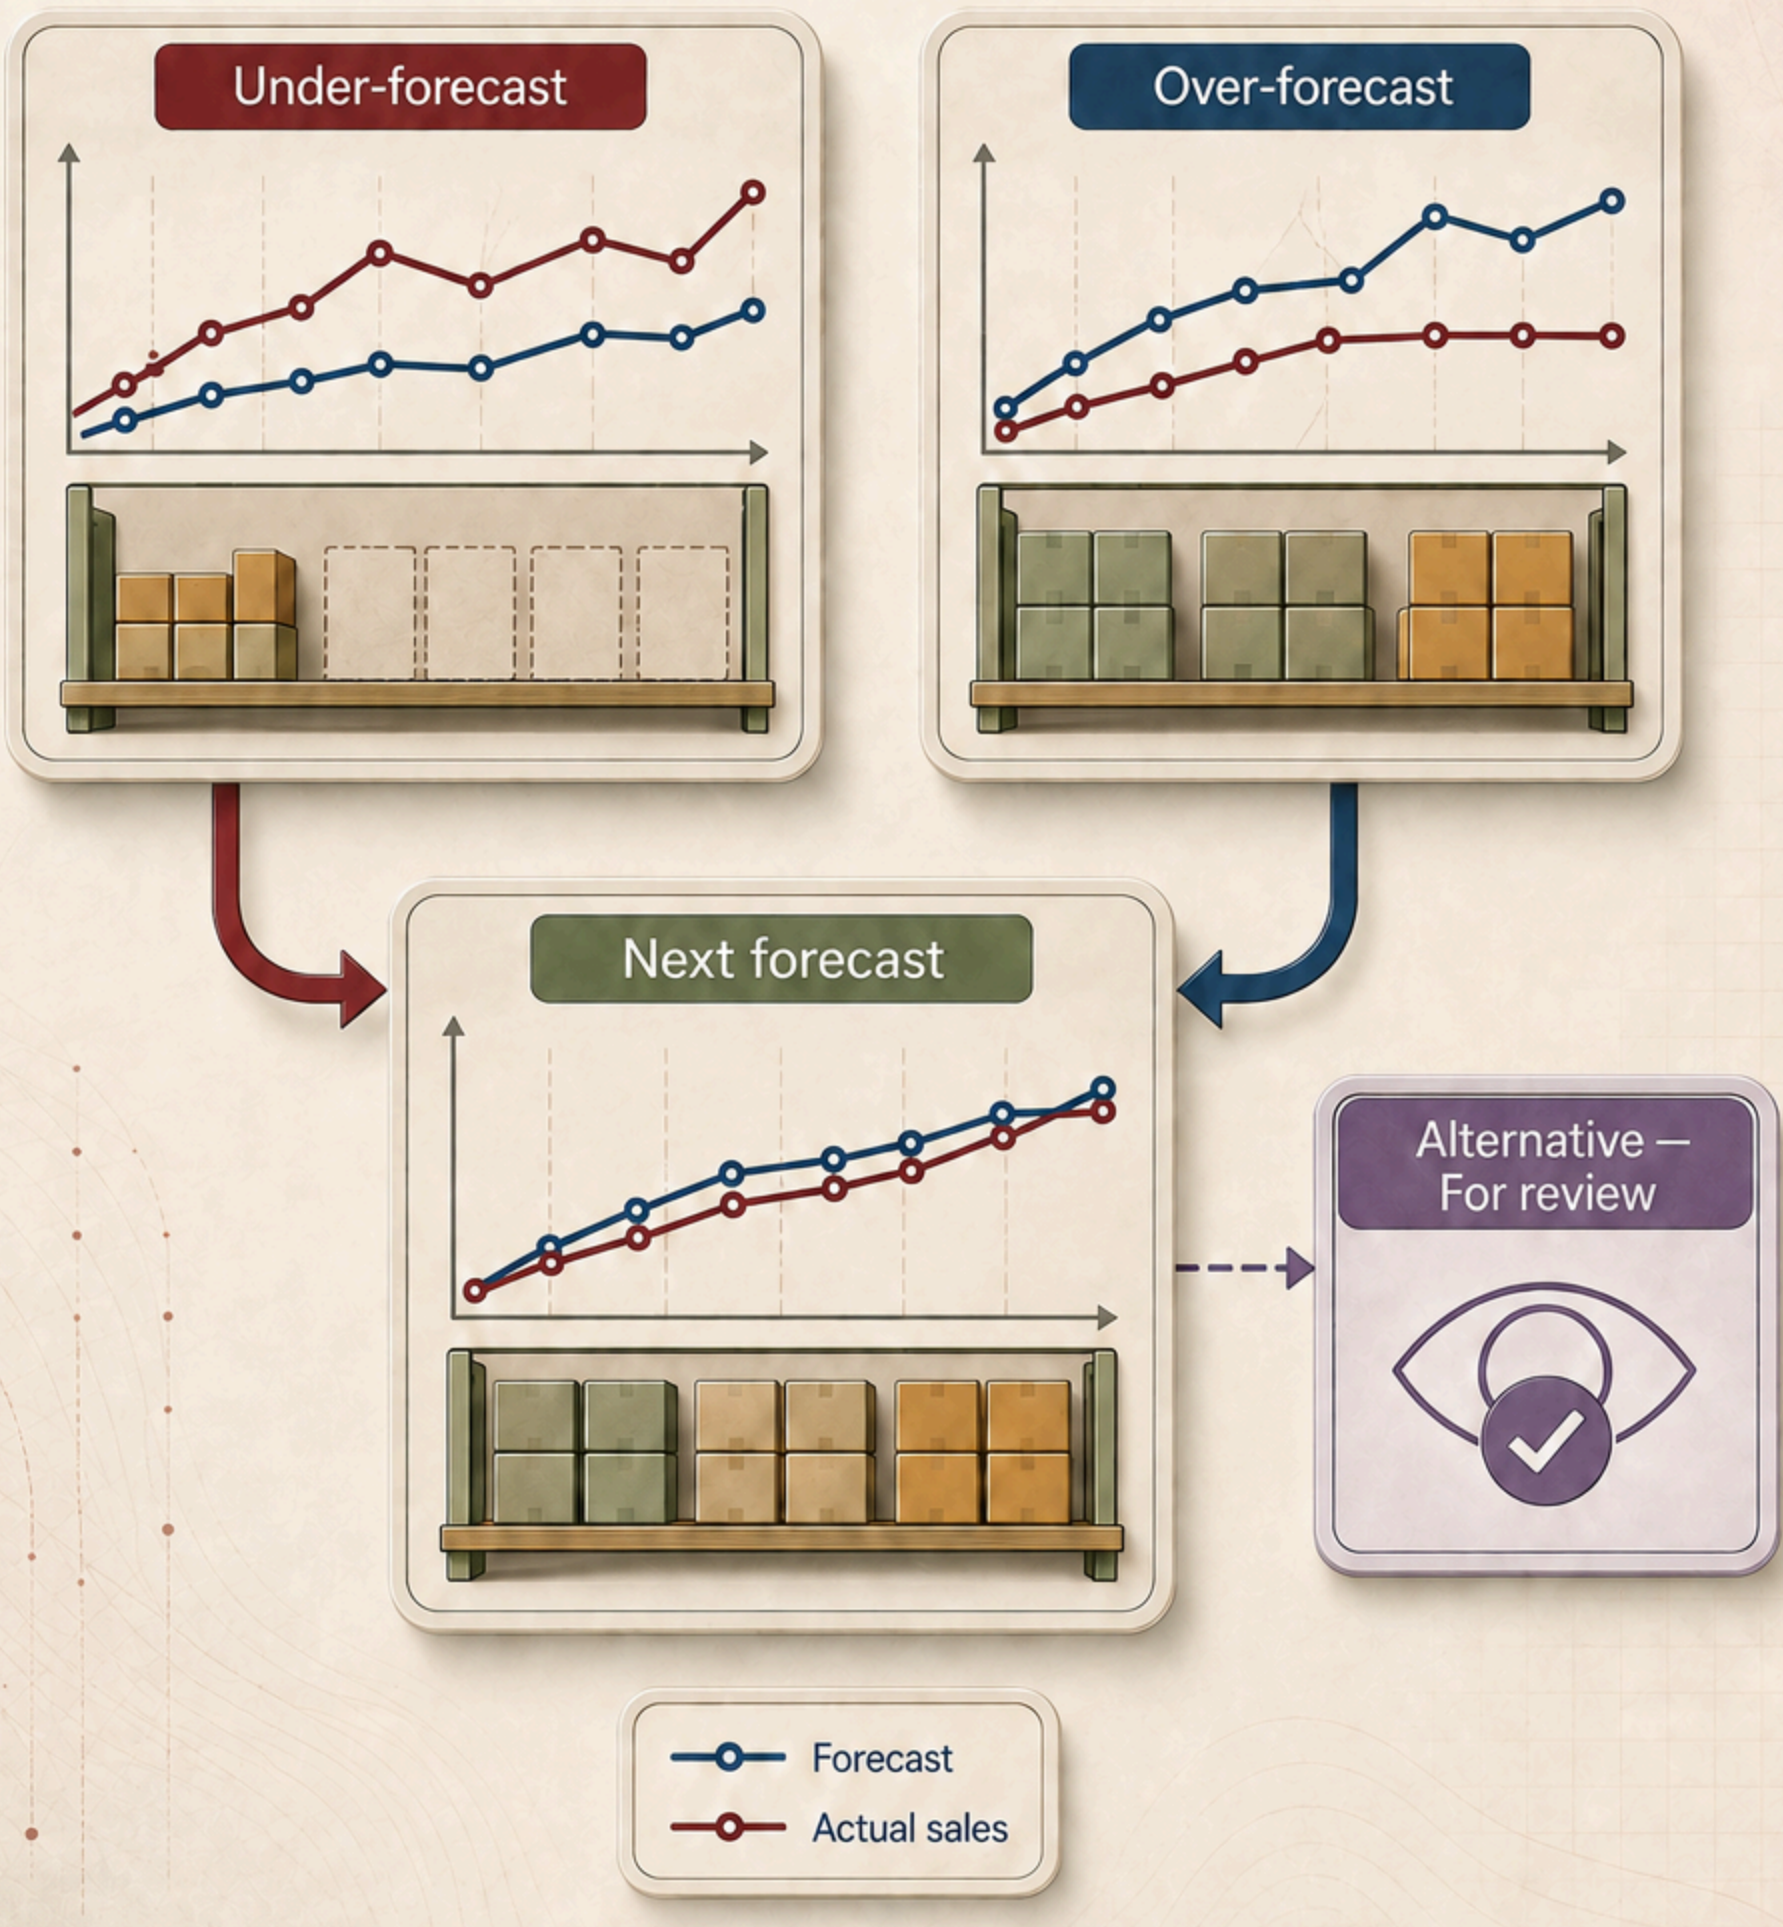

When to act

Adaptive Learning

Learn from every completed forecast.

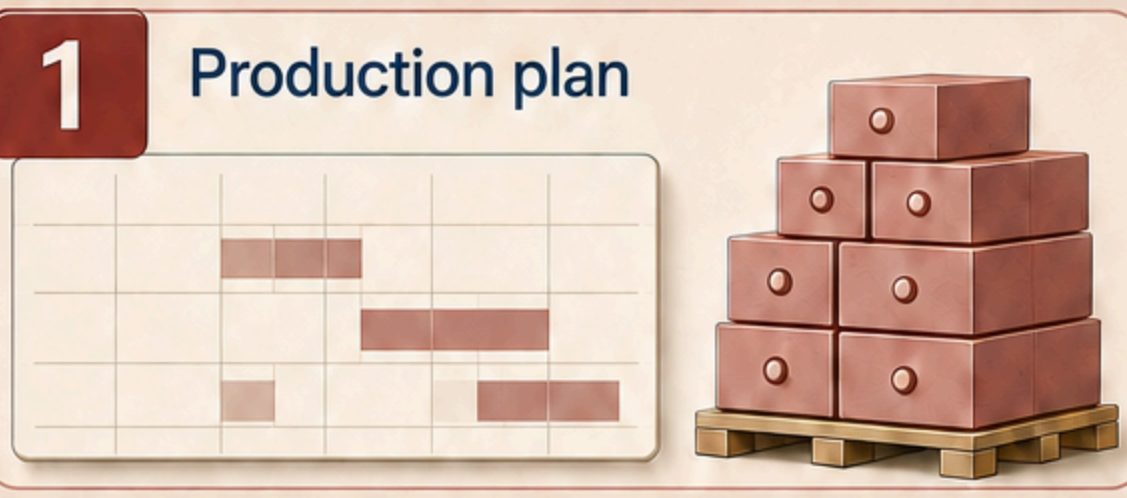

- Compare forecast with actual sales.
- Spot repeated misses.
- Adjust the next forecast.
- Keep alternatives under review.

End-to-End Management

One approved plan moves through every team.

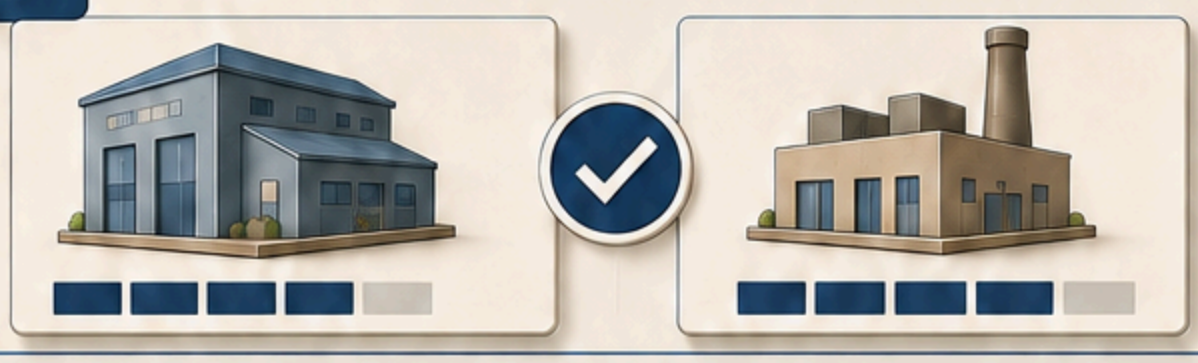

1 Production plan

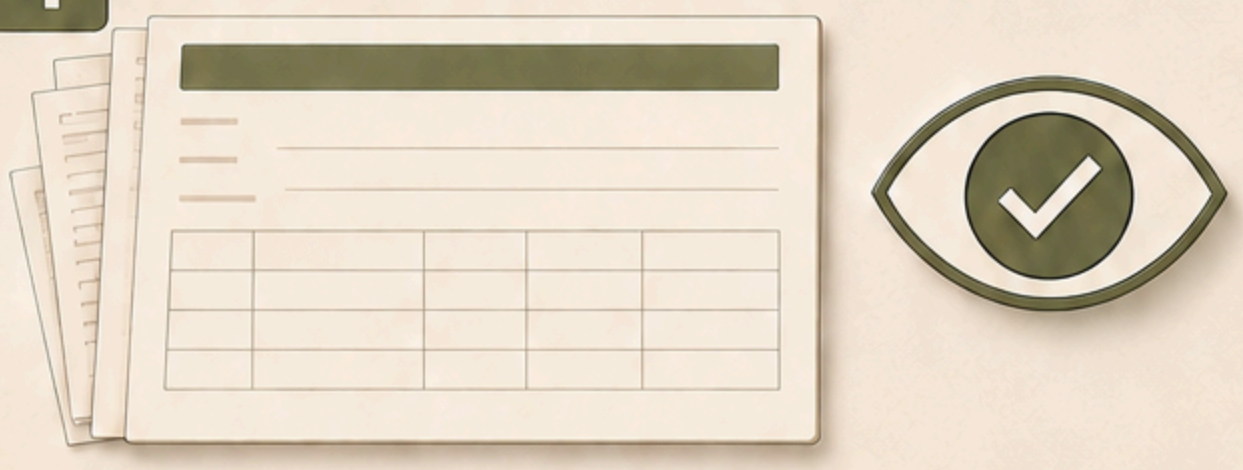

2 Materials needed

3 Supplier choice

4 Purchase order for review

Clear Explanations

See the reasons before you act.

Demand

Current stock

Incoming supply

Replenishment time

How was this quantity calculated?

Recommendation

What changed since the last plan?

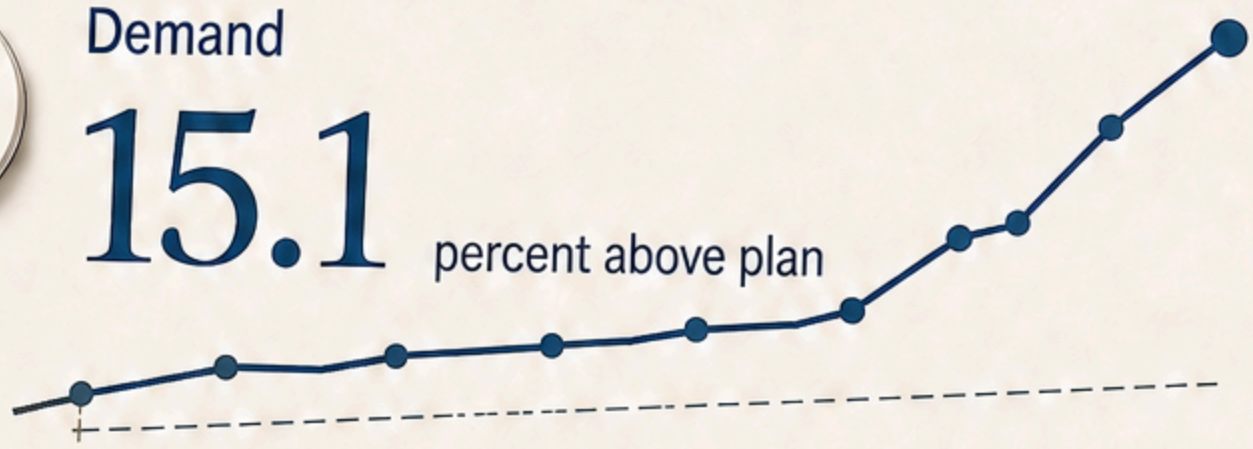

What could change the answer?

Weekly Pulse Report

The whole week, already put into perspective.

Demand

15.1 percent above plan

Timing

3.1
days of stock

7
days to replenish

3.9-day
coverage gap

Materials

93.2 percent covered

Close the material gap. Bring production forward.

Illustrative example.

Stay In Control

- Review every recommendation.
- Approve changes before they take effect.
- Keep one clear plan across the team.
